

A Collaborative Effort

EMPLOYING A GREAT eye for style, James and LeAnn Bound, owners of Greencraft Builders Inc., construct discerning dwellings for families in Western North Carolina with careful attention to detail and a collection of fresh, inspiring ideas. And their new home, which they built for their own family, is no exception. The couple's choice to seek the expertise of Benbow & Associates Inc. for cabinetry planning was based on an established working relationship and shared love of fine craftsmanship.

Within their kitchen, the homeowners desired a rustic, modern aesthetic complete with an island that functioned as a work/prep/serving area. To create their dream culinary space, April Hand and the Benbow team fashioned a maple topped table-style island. The island includes a food-grade oil finish, cherry legs, and a sink to serve multiple functions.

Custom-crafted open shelves, secured by custom steel brackets, replace traditional wall cabinets.

This contemporary cabinetry radiates a rustic aesthetic, which is carried through into the flooring. A large pantry provides ample space to store necessities for the couple's two young children or for playing host to friends and family who find their way into the Bounds' welcoming home. *Learn more about this design firm at benbowassociates.com.*
